

# Know your fuel colours

**Regular or Premium  
Petrol**

Clear-yellow colour

**Blend of Regular or Premium  
+ Low aromatic / Opal**

Rust colour

**Low aromatic fuel /  
Opal**

Purple colour

Low aromatic unleaded fuel (sometimes known as Opal fuel) reduces petrol sniffing. The availability of Regular or Premium unleaded fuel can sometimes lead to increases in petrol sniffing.

By identifying the type of fuel, we can work to limit access and help to reduce petrol sniffing.
